Vintage Needlecase (Bouquet Design):

Consists of 3 pieces. The outer case and stem section are transfer patterns, the inside section is a printed pattern. Stamp the transfer patterns on felt, flannel or broadcloth.

Cut out material, cutting along the inner edge of the stamped line. Pin the printed pattern for inside section on contrasting felt, flannel, or broadcloth and cut out.

To Embroider

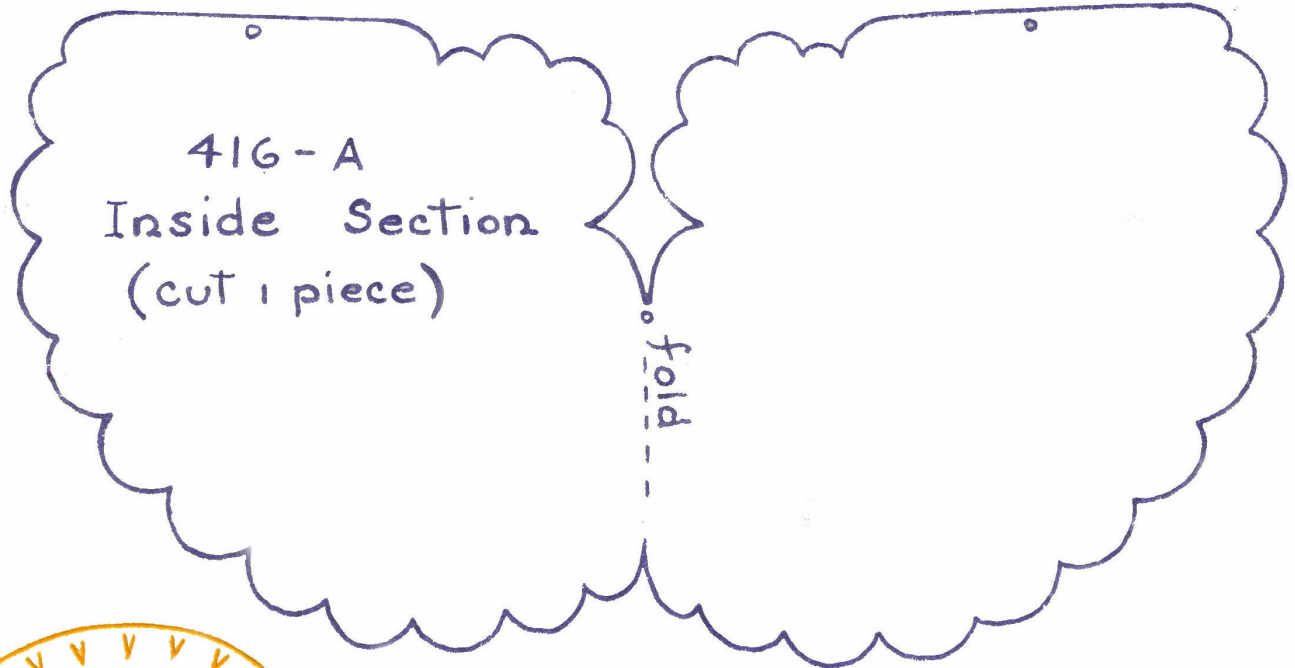

Use embroidery wool split to half the thickness and embroider in green, rose, violet, blue, yellow and white (to match material). Work in lazy daisy stitch, buttonhole stitch, French knots and straight stitches.

Lap the stem over the back of case matching the broken line and fasten to position with lazy daisy stitches over the "V" shaped marks. Place the inside section over the wrong side of material for outer section (about 1/16 inch below the top edge of case) and slip stitch from circle to circle and along the center fold line (leaving side and lower edges free). Fold on line indicated and fasten edges together at circle beneath an embroidered leaf. Tie a ribbon bow around stem and fasten to position at cross.

Note: The print copy of this pdf will be smaller than true to size, enlarge the pattern as you wish. The original pattern measures approximately 7.5 inches across the width of the inside section piece (at widest points).

(This pattern was originally published in 1936)
